

MOHD RAYYAN BIN MOHD JAWEED

Data Scientist | AWS Certified

+91 - 8106931514 | ✉ rayyan.rbj0409@gmail.com | 🔗 [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Data Science professional skilled in Python, SQL, AWS, Machine Learning, NLP, RAG, and LLM deployment. Experienced in building financial data solutions, Agentic AI, and Generative AI applications, with a focus on scalable AI agents, predictive analytics, statistical analysis. AWS Certified AI Practitioner (AIF-C01) with a strong interest in financial analytics, Generative AI, and production-grade ML systems.

TECHNICAL SKILLS

Programming: Python

Databases: MySQL, PostgreSQL

Machine Learning: Supervised Learning, Unsupervised Learning, Classification, Regression, Feature Engineering, Model Evaluation, Model Deployment, Hyperparameter Tuning, Predictive Analytics

Deep Learning: PyTorch, Neural Networks, Transfer Learning

Generative AI & NLP: Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), LangChain, Prompt Engineering, Vector Databases, BERT, Hugging Face Transformers, OpenAI API, Gemini API, NLP

Data Science & Analytics: Statistical Analysis, Exploratory Data Analysis (EDA), Data Cleaning, Data Wrangling, Data Visualization, A/B Testing

Libraries & Frameworks: Scikit-learn, Pandas, NumPy, Polars, Flask, FastAPI

Cloud & MLOps: AWS (S3, EC2, SageMaker, Lambda, RDS, Glue, CloudWatch, Bedrock), Git, Docker, CI/CD

Visualization: Power BI, Tableau, Matplotlib, Seaborn

CERTIFICATIONS

AWS Certified AI Practitioner (AIF-CO1) – [Digital Badge](#)

PROFESSIONAL EXPERIENCE

Data Scientist | The Ascent Group

Feb 2026 – Present

- Built scalable ETL/ELT processes for financial data processing, integrating and transforming multiple datasets to support machine learning workflows and analytics.
- Engineered automated preprocessing frameworks reducing data preparation effort by approximately 30%.
- Validated and reconciled financial datasets, including P&L, derivative fees, and margin interest data, using Python, Pandas, and statistical techniques to identify inconsistencies and improve data accuracy.
- Applied statistical analysis and feature engineering techniques for anomaly detection and risk analysis.
- Collaborated with engineering and business stakeholders to translate financial reporting requirements into scalable data solutions.

FinSight AI – Earnings Call Intelligence Platform

Python | LangChain | RAG | LLMs | AWS | Financial Analytics

- Developed an AI-powered financial intelligence platform leveraging RAG and LLMs to analyse earnings-call transcripts and financial disclosures.
 - Reduced manual earnings-call review time by approximately 70% through automated retrieval and AI-generated summaries.
 - Implemented vector embeddings and contextual retrieval to improve financial document search relevance.
 - Designed sentiment analysis workflows to identify management outlook, risk indicators, and forward-looking statements.
 - Developed executive summarization and question-answering capabilities using Amazon Bedrock foundation models (Claude 3 Sonnet), enabling natural language interaction with financial documents.
-

SurgiMind – Surgical Tool Detection & AI Platform

Python | AWS SageMaker | Lambda | Computer Vision | REST APIs

- Built an end-to-end Computer Vision solution on Amazon SageMaker, enabling data preparation, model training, deployment, and inference on thousands of annotated image samples.
 - Automated storage and retrieval of datasets and prediction logs using RAG.
 - Implemented CloudWatch monitoring to improve endpoint reliability and operational visibility.
 - Designed REST APIs enabling real-time communication between ML inference services and backend applications.
 - Deployed scalable inference endpoints on AWS SageMaker and Lambda, reducing prediction response time by approximately 40%.
-

ASD Screening & ML Prediction System

Python | Scikit-learn | Streamlit | Pandas

- Trained and evaluated machine learning models on Q-Chat-10 behavioural screening data for ASD risk prediction.
 - Achieved over 90% classification accuracy using a Random Forest classifier on behavioural assessment features.
 - Applied feature engineering, label encoding, and data preprocessing techniques to improve model readiness.
 - Evaluated models using Accuracy, Precision, Recall, F1-Score, and ROC-AUC metrics.
 - Developed and deployed an interactive Streamlit application delivering real-time ASD risk predictions and probability scores.
 - Reduced screening assessment time through automated prediction.
-

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science & Engineering
Jawaharlal Nehru Technological University Hyderabad (JNTUH)

2022 – 2026
